In the world of laminates, expect to find splinter-free wood, anti-corrosion metal or budget-friendly marble for your home. Whether you want an industrial chic living space or a contemporary abode, they are your best bet because of their versatility. Simple to install, easy to maintain, and sturdier than natural materials, laminates embody an immense design potential and are a cost-effective way to turn your home into a whole new world.

For years, Lamitak, TAK's brand of laminates, has been embracing daring and surreal designs that fuse trends from Europe and all over the world while

staying true to the Asian palette. Taking its inspiration from travels, acute observations and tactile materials, the brand is all about surprising its customer base with unexpected laminate designs that help ignite the imagination.

Discover endless creativity

There are countless ways to incorporate laminates in interior spaces. While they are one of the more popular laminate choices in Singapore, the intriguing aesthetics of Lamitak's new 2014-15 collection sets new trends

in laminate design so you can unleash your most imaginative creative vision.

Go for shabby chic interiors with walls that look like weathered timber from the Milnerton range, a linear design which embraces the aesthetic of repainting and reuse. Or add a textural depth to your living space with a column or two of the Marmo Flavio, a gritty and grainy, rough stone design that brings to mind the ruins of ancient Rome.

Give personality to your furniture pieces—such as the coffee table, dining chairs or the sides of a cabinet—by resurfacing them in laminates with graphic patterns. Designs from the Rialto Pine range play up the effects of wood fibres—minus all the splinters—to lend a rustic charm to your spaces. Create a rust-free industrial statement with a feature wall covered in the collections from Tobias Steel, which features an intricate steel design.

Laminates are not just for big surfaces. Dress up a bookcase by covering the back of the shelves with laminate. Or customise your furniture according to your home's concept with carpentry works from wall feature, kitchen cabinets or even benches.

Easy care & maintenance

Because they are treated to be fire-retardant and water-resistant, and are scratch-resistant, laminates are not that hard to maintain. Here are a few tips:

1. To remove most stains, just wipe with a clean non-abrasive cloth and warm water. Use a mild household cleaner or detergent only if necessary. For stubborn stains, try baking soda with water.
2. Special attention may be required for stubborn stains – apply a small amount of thinner on a clean non-abrasive cloth to gently remove stain and rinse the area with another clean damp cloth.
3. Do not place heated items (pot & pans) directly onto the laminated surface.
